

Approved For Release 2002/08/21 : CIA-RDP80R01731R000500160007-7

DEPARTMENT OF THE ARMY
OFFICE OF THE QUARTERMASTER GENERAL
WASHINGTON 25, D. C.

IN REPLY REFER TO: QMCG 1461
Report

13 July 1951

Mr. George Farrier
c/o Wendell Phillips
c/o British Agent
Western Aden Protectorate
Aden, South Arabia

Dear Mr. Farrier:

I very much enjoyed reading your excellent report of 31 March forwarded through Dr. Albright. The information contained therein was extremely interesting as well as pertinent to our research in desert clothing. Your experience in headgear more or less parallels our own. The pictures are excellent. This material is being inspected by members of the Hot Weather Clothing Steering Committee.

I am sorry to learn of the loss of your maximum thermometers. Observations taken every half hour will no doubt give a fairly representative daily maximum temperature. We are anxious to see these data. We will correlate them with the clothing pictures. Such correlation should be given in the final report which you intend to prepare.

You indicate that you will be returning soon. I hope I will be available to confer with you and that you could perhaps give our people a talk on what you have seen and be available for questions. However, I am currently awaiting uninvited orders to report to active duty with the Air Force. If this does take place, I will appreciate your contacting Dr. Peveril Meigs. He will carry on in my place.

Kindest regards,

Sincerely yours,

NORMAN SISSEWINE, Physicist
Environmental Protection Section
Research and Development Branch
Military Planning Division
